### SUMMARY

Results-driven Fullstack Developer with extensive experience in building scalable web applications using modern technologies such as HTML5, CSS3, JavaScript (ES6+), React, Redux, TypeScript, Node.js, and RESTful APIs. Proven ability to lead development teams, manage project timelines, and deliver high-quality software solutions under tight deadlines. Strong background in responsive design, version control with Git, and performance optimization. Adept at translating business requirements into technical specifications and collaborating cross-functionally for successful product delivery.

### PROJECT EXPERIENCE

**Portfolio**, [Github repository](#) (HTML, CSS, JavaScript, Vite) One-page site-portfolio with a responsive layout and dual color theme. Role: Team Lead, developer. Build project on github, check for build errors and live page performance.

**Task Pro**, [Github repository](#) (HTML, CSS, JavaScript, React, Redux, Node.js, Vite). Single-page application - task manager to manage current tasks, with convenient categorization and sorting/filtering. Role: Team Lead both parts - front & back, developer. Build project on github, check for build errors and live page performance.

**TravelTrucks**, [Github repository](#) (HTML, CSS, JavaScript, React, Redux, Node.js, Vite). Single-page application for rent campers, with convenient sorting/filtering. Role: developer.

**Merge Master**, [Github repository](#) (HTML, CSS, JavaScript, Vite). Landing page for mobile game. Role: developer.
